

## Disposable samplers, blue

The shade of blue that is used does not occur in a natural form in foodstuffs. Because of this, blue products or parts of them can be quickly found and easily identified in a visual check if they are ever mixed into production. The use of blue tools thus helps to meet the requirements of the HACCP hazard analysis and assessment in reference to foreign objects. This is an important criterion, especially in food processing and production and in the animal feed and pharmaceutical industry.

### Detectable disposable samplers

These scoops, spatulas, spoons and scrapers are not only coloured blue but also have a special additive in the material that makes them visible to metal detectors or X rays. These products can therefore be rejected with standard systems for checking for foreign objects, even though they are made of plastic.

- ▶ Can be detected by colour scanners, metal detectors or X-rays
- ▶ PS detectable, blue

#### Food scoop, blue

The disposable scoop is ideal for powders, granulates and pastes. Ergonomics were particularly important to us for the design of the sample scoop. The scoop stands horizontally due to the special handle design and the slightly angled front edge and can therefore be put down without the sample material trickling out.

#### Spatula for foodstuffs, blue

As a result of the long, ergonomically-shaped, stable handle and a sharp blade, it is possible to even penetrate directly into containers such as paper or plastic sacks. The disposable spatula is ideal for sampling powders, granulates and pastes.

Insertion depth mm	Length mm	Pieces per pack	Item no.

#### Measuring spoons, blue

Volumetric and dosing spoons can be used to measure small amounts of powder, granulates and liquids exactly and dose them precisely. For precise measuring, excess medium is stripped off the upper edge of the spoon. The content volume is engraved on the handle.

#### Sampling bag SteriBag Blue

To prevent the danger of foreign matter in production, the sample bags and the tear-off closure are coloured blue. The disposable sample bag is approved for contact with foods. It is suitable for storing and transporting solid, semi-solid and liquid media. Thanks to the large opening, the SteriBag Blue can be filled easily. The sample bag with labelling field is space-saving, easy to transport and leak-proof.
